

NIKKO PARIN

Shopify Developer / Designer & Graphics Designer

Cavite, Philippines | hello@nikkoparin.work | nikkoparin.work

Hello there!

I hope everything is going smoothly for you today!

I was really excited to spot your job listing for a Shopify Developer role. With 8+ years of experience as an all-rounder developer and designer who can handle various tasks, I'm genuinely looking forward to the possibility of collaborating with you and your team.

- **Experience** - Over the span of 8 years, I've cultivated a solid foundation in my field, working closely with clients from the USA, UK, and Australia. This experience has broadened my perspective and enhanced my adaptability.
- **Expertise and Growth** - I began my career as a Graphic Designer before transitioning into Web Development. Since 2016, I have specialized in the Shopify platform, actively building and customizing stores. I have witnessed the evolution from Shopify Themes 1.0 to 2.0 and kept up with key updates such as metafields/metaobjects, code structure (layout, template, sections & blocks), checkout extensibility and more. I also bring hands-on experience in conversion rate optimization (CRO), split testing, 3rd party apps integration and collaborating with teams to successfully launch products.
- **Resourceful** - I can find practical solutions and offer ideas that help pave the way for future development and design steps. I'm dedicated to providing my clients with the best choices that can elevate the project's performance.

I'm actively looking for my next opportunity and available to begin anytime. I'm truly excited about the possibility of joining your team, showcasing my skills, and contributing to your organization's continued success.

If you're interested in exploring further details about my work, please don't hesitate to visit my portfolio at <https://nikkoparin.work> or take a look at the resume I've provided. Thank you!

Sincerely,
Nikko Parin
